

AWARD RATES OF PAY INDEXES, AUSTRALIA, MAY 1996

NOTE: Wage variations from enterprise bargaining awards and agreements are generally excluded from award rates of pay indexes. See paragraph 16 of the Explanatory Notes. Application of the \$8 "safety net" adjustments to the indexes is explained in paragraph 18 of the Explanatory Notes.

SUMMARY OF FINDINGS

Annual Movements (May 1995 to May 1996)

Over the 12 months to May 1996, the weekly award rates of pay index for full-time adult employees rose by 1.2 per cent. For full-time adult females and full-time adult males the indexes rose by 1.4 per cent and 1.1 per cent respectively.

The largest movements over the period for full-time adult females and males occurred in the Public administration and defence industry (3.1% and 2.0% respectively), and in the

Recreation, personal and other services industry (2.4% and 1.9% respectively).

In terms of occupation groups, the largest increases for full-time adult females were for Clerks (1.6%), and for Salespersons and personal service workers (1.5%). For full-time adult males the largest increases were for Clerks (1.5%), and for Managers and administrators and Professionals (both 1.3%).

INDUSTRIES, FULL-TIME ADULT EMPLOYEES, PERCENTAGE CHANGE, TWELVE MONTHS TO MAY 1996

(a) Data not available for females in these industries.

OCCUPATIONS, FULL-TIME ADULT EMPLOYEES, PERCENTAGE CHANGE, TWELVE MONTHS TO MAY 1996

INQUIRIES

- for further information about statistics in this publication and the availability of related unpublished statistics, contact Geraldine Cote on Canberra (06) 252 5325 or any ABS State office.
- for information about other ABS statistics and services please refer to the back page of this publication.

At the State level, the largest increases in the year to May 1996 for full-time adult males were in the Australian Capital Territory (3.6%) and in South Australia (1.4%). For full-time adult females the largest increases were in the Australian Capital Territory (2.6%) and in New South Wales (1.7%).

Monthly Movements (April 1996 to May 1996)

For the period April 1996 to May 1996 the largest movements for full-time adult males and females occurred in the Manufacturing industry (0.4% and 0.3% respectively).

In terms of occupation groups, the largest increases were for full-time adult male and female Tradespersons (0.3% and 0.2% respectively), and Labourers and related workers (0.2% and 0.3% respectively).

At the State level, the largest increase for full-time adult females was in South Australia (0.5%). For full-time adult males the largest increases were in South Australia (0.3%) and in New South Wales (0.2%).

Effects of Wage Case Decisions

The following graph shows monthly percentage movements for full-time adult weekly award rates of pay indexes. The relatively strong increases in the index in December 1993 and April/May 1995 resulted, in part, from pay increases to awards which had received the first and second \$8 "safety net" pay rises. A further increase appears in March 1996 when some awards started to receive the third \$8 "safety net" pay adjustment.

FULL-TIME ADULT WEEKLY AWARD RATES OF PAY INDEXES, AUSTRALIA
MONTHLY PERCENTAGE CHANGE, MAY 1993 TO MAY 1996

NOTES

The Award Rates of Pay Indexes are compiled from data obtained from wage fixing authorities, both Federal and State, relating to variations in prescribed award wages and hours.

Explanatory Notes are published at the back of this publication.

Users should note that revisions to indexes are made where award variations are retrospective, or when there is a delay in receipt of notification of variations. See paragraph 19 of the Explanatory Notes.

(a) Includes wood, wood products and furniture; non-metallic mineral products; and miscellaneous manufacturing, but does not include all other manufacturing groups.

(b) Excludes employees in the defence forces; agriculture; services to agriculture; and employees in private households employing staff.

Note: Statistics covering a more detailed industry classification may be available on request. See paragraph 32 of the Explanatory Notes.

EXPLANATORY NOTES

Introduction

This publication contains indexes for weekly and hourly award rates of pay for full-time adult wage and salary earners. These indexes have been compiled on a monthly basis since the base month of June 1985.

2. The methodology used to construct the Award Rates of Pay Indexes is in general similar to that used for other indexes such as the Consumer Price Index and the Producer and Foreign Trade price indexes. It is based on a representative 'basket' of award classifications. The indexes are constructed by weighting award rates of pay for selected classifications according to the pattern of employment that existed at May 1985. The 'basket' of classifications, and their weights remain constant during the life of the indexes, so changes in the indexes reflect general trends in award rates of pay over time. They do not measure relative levels of average award rates of pay between States, industries, awards and occupations.

3. All award rates of pay series are expressed as index numbers with a reference base of June 1985 = 100.0. The base for the new series of June 1985 was determined using data obtained from the Survey of Employee Earnings and Hours conducted in May 1985.

4. The December 1987 issue of this publication contains the first release of these series. That issue provides a large number of series covering the period from June 1985, as well as four appendixes containing:

- distribution of the weights used to construct the indexes;
- weighted average minimum standard hours at the base period;
- weighted average minimum award rates of pay at the base period; and
- factors for linking the current and previous series.

5. These series replace an earlier series which covered the period June 1976 to November 1987. For more information regarding the methodological and conceptual differences between the previous series and the current series, refer to *Information Paper : Award Rates of Pay Indexes* (6343.0) released on 11 February 1988.

Scope and coverage

6. The award rates of pay for full-time adult employees, which are normally varied in accordance with awards, determinations or registered collective agreements, have been selected in the indexes. As at June 1985, the indexes cover 3.0 million persons (2.1 million males and 0.9 million females). Approximately 3 per cent of full-time adult employees were covered by unregistered agreements (i.e. those agreements made by an employer with a group of employees and which are not registered with a Federal or State wage fixing authority). For statistical purposes these have been considered to be similar to awards. The rates prescribed in the more important of these, such as the collective agreement between the State Transport

Authority of Victoria and some of its employees, have been included in the indexes.

7. Rates of pay applicable to approximately 16 per cent of full-time adult employees (as at June 1985) who are not covered by awards, determinations or registered or unregistered collective agreements, are not covered by the indexes. This includes those employees whose rates of pay and conditions of work are not normally varied in accordance with variations in a specific Federal or State award, determination or registered collective agreement or a specific unregistered agreement.

Collection of award information

8. Information on award rates of pay for selected classifications is obtained from a variety of sources. The primary updating sources are advices of award variations determined or authorised by industrial tribunals. A number of secondary sources are also used including the Employers' Federation of N.S.W. and the Victorian Employers' Federation. Information obtained by these means is used to update award rates of pay for each selected classification on a monthly basis and used for the compilation of the monthly indexes. In recent times, the flow of variation advices from these sources has slowed to the extent that only small movements are reflected in the indexes.

Design of the indexes

Selection of the classifications

9. The source used to base the indexes is the May 1985 Survey of Employee Earnings and Hours. The Survey collected information on the industry and occupation of individual employees, the award under which they are covered and their award classification.

10. This information was used to stratify classifications by industry, occupation and State as part of a sample design which ensured that the indexes have been produced at a satisfactory level of reliability for all cross-classifications included in the series.

11. A sample of approximately 700 awards and 5,500 award classifications has been selected for inclusion in the indexes.

Compilation

12. Data on the award rates of pay from June 1985 and subsequent months have been compiled for each of the selected award classifications. Estimates of weighted average award rates were calculated by expanding data from the sample of award classifications. The estimates for June 1985 for each component of the series were then converted to an index value of 100.0.

Weighting

13. The weighting pattern of the indexes is determined at the award classification level. The weights applied to the award classifications included in the indexes are derived from the May 1985 Survey of Employee Earnings and Hours. The distribution of the weights used in the construction of the indexes is shown in Appendix A of the December 1987 issue of this publication.

14. Awards have been divided into two groups, 'major' awards and 'minor' awards, depending on the estimated employment coverage of each award. All 200 major awards have been included in the indexes, while only a sample of approximately 500 minor awards have been included. For classifications selected within major awards, the employment benchmarks have been inflated in the indexes to account for the total employment within the award. For classifications selected within minor awards, employment benchmarks have been inflated in the indexes to account for the total employment coverage of all minor awards.

Limitations of weighting

15. The indexes are fixed weight indexes. The weights of the indexes need to be reviewed periodically because of the problems inherent with having fixed weight indexes. In particular, the indexes are not responsive to changes in the structure and coverage of awards, and are likely to become less representative and therefore less reliable over time. An example of this type of problem occurred with the Victorian Nurses Award. This award underwent a major restructuring during 1986 with some classifications being amalgamated and others being split into two or more classifications. This type of restructuring of an award in the indexes means that an equivalent classification needs to be selected from the revised award structure. However, until a complete review of the indexes is carried out, the old weighting structure must be used.

Enterprise Bargaining

16. Payments and conditions of employment specified under formalised enterprise bargaining awards and agreements established since October 1991 are generally excluded from the compilation of these indexes. Awards included in the index are a large sample of the awards in existence in May 1985. Thus, the indexes exclude any awards coming into effect since that time, except where an old award has been completely superseded by a new award or agreement. Similarly, as at 1 March 1993 all Victorian State awards ceased to exist and changes from this source will not be reflected in the indexes unless an expired award is superseded by a new award.

17. The above treatment of enterprise bargaining is also a limitation of the fixed weighting of the index as any new awards used in the index will assume the weights applied to the old award it replaces. Where any award in the sample includes some employees involved in the enterprise bargaining process, any increase in rates in that award approved by a Federal or State industrial tribunal will be applied according to the total employment recorded for that award in May 1985.

18. The \$8 "safety net" pay rises resulting from the October 1993 Review of Wage Fixing Principles and subsequent decisions are reflected in the Award Rates of Pay Indexes for ALL employees covered by awards whose application for a wage rise is ratified by the appropriate State or Federal arbitral authorities. This includes all employees formerly covered by Victorian State awards as well as all employees covered by awards but involved in the enterprise bargaining process. The current index methodology does not allow these employees to be excluded. Consequently these award rates of pay are

varied using the existing weights i.e. total employment levels as at May 1985.

Revision of the indexes

19. In some cases, when awards etc. are varied, the new award rates are made retrospective. In addition there is sometimes a considerable delay in the receipt of notification of changes in award rates in respect of the classification included in the indexes. Because of these factors the figures in this publication are subject to revision. Revisions for States, industries and occupations are included in this publication. Revised figures for each industry and occupation group in each State are available on request.

Definitions

20. The *award rates of pay* used in the compilation of the indexes :

Include

- (i) the base rate and any allowances or loadings that are applicable to ALL employees under a specific award classification (e.g. industry allowance); and
- (ii) supplementary payments when they are specified within the award.

Exclude

- (i) remunerative allowances. It is considered that these allowances are paid to reimburse employees for expenses they are expected to incur during the course of their employment (e.g. tool allowances). The inclusion of these allowances would not reflect the true level of remuneration of these employees;
- (ii) superannuation payments and other payments such as severance and termination payments which are paid to employees as part of an award agreement; and
- (iii) payments negotiated under formalised enterprise bargaining awards and agreements that were established since October 1991. See paragraph 16 of the Explanatory Notes.

21. The *weekly award rates of pay series* for full-time adult employees provide details of the movements in the weekly rates of pay for award classifications included in the index.

22. The *hourly award rates of pay series* for full-time adult employees provide details of the movements in the hourly rates of pay for award classifications included in the index. These series include only those awards and classifications where hours of work are specified in the award.

23. Estimates of *standard weekly hours of work* previously included as an appendix to the June and December issues of this publication can now be obtained on request via a special data service. Inquiries should be made to Geraldine Cote on (06) 252 5325. These estimates apply to all wage and salary earners where standard hours are specified in the award etc. They refer to weighted average standard weekly hours of work where the weighting is based on the weights used for the construction of the award rates of pay indexes.

24. Estimates of the *weighted average minimum weekly award rates of pay* are based on the weights used in the construction of the award rates of pay indexes. The weighted average minimum award rates of pay at the base period are included as Appendix C of the December 1987 issue of this publication.

Reliability of indexes

25. Since the indexes are based on information obtained from a sample of employers they are subject to sampling variability. That is, they may differ by chance from figures that would have been produced if all employers had been included in the survey.

26. Inaccuracies may also occur because of imperfections by respondents or in processing by the ABS. Inaccuracies of this kind are referred to as *non-sampling errors*. Although considerable care is taken in questionnaire design; in the instructions given to employers on how to select a sample of their employees; in editing the survey returns; and in relating the figures to comparable statistics, these inaccuracies may occur in any enumeration, whether it be a full count or a sample. As an example, non-sampling error may occur in the survey where employers are uncertain of the precise awards and classifications which cover their employees.

Comparability of results

27. For an explanation of the comparability of results between the Award Rates of Pay Indexes (ARPI) and Average Weekly Ordinary Time Earnings see the November 1993 issue of this publication.

Classification of industry and occupation

28. Industry is classified according to the *Australian Standard Industrial Classification (ASIC), 1983* (1201.0). Occupation is classified according to the *Australian Standard Classification of Occupations (ASCO)* (1222.0).

31. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue of Publications and the Release Advice are available from any ABS office.

Unpublished statistics

32. In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, computer printout, clerically-extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries for unpublished statistics related to this publication should be made to Geraldine Core on (06) 252 5325, or to Information Services in the nearest ABS office.

Symbols and other usages

... not applicable

33. As the indexes are rounded to one decimal place, discrepancies may occur between the published annual percentage changes in Tables 1, 4, 5 and 6 and the value which would be produced by calculating the percentage change from the published statistics.

Forthcoming issues

34. The following table shows the dates on which the *Award Rates of Pay Indexes, Australia* (6312.0) publication is expected to be released.

	Issue	Expected Release Date
1996	June	2 August 1996
	July	6 September 1996
	August	4 October 1996
	September	1 November 1996
